

THE EMPRESS EXPRESS

VOLUME XVIII. No. 6

EMPRESS, ALTA. THURSDAY, July 10, 1930

Price: \$2.00 Per Year.

United Church
Church School, 10:30 a.m.
Public Worship, 11:30 a.m.
Subject: "Christian Joy and Efficiency."
Services will be held at:
Leland, 2:30 p.m.
Social Plains, 7:30 p.m.
"The world needs a prayer—sing."
The world needs a song—sing."
We invite you to worship God.
Rev. Geo. A. Shields,
Minister.

"Our Dancing Daughters"

The plot concerns a reckless happer who kisses freely and loses the affections of the man she loves because of the gossip that follows in the wake of her madcap adventures. Her elum, a girl who has loved not wisely, but too well, obtains forgiveness from her fiancé and is married, only to find that her husband looks upon her former mad friends with a suspicion he cannot erase from his mind. The two girls, despairing of happiness, attend a gay bon voyage party, where the gold-digger, who married the man the first girl loved, creates a sensational scene. The husband, his eyes opened to his wife's duplicity, realizes he really loves the girl he rejected. In a moment of drunken frenzy, the gold-digger wife hurls herself down a flight of stairs and is killed. The tragedy brings both couples to the realization that life

Married Men's Team Unbeaten At Softball

Softball games have been the foremost sport in town during the past week. A league has been formed. The following games have been played:
C. P. R. beat Mustard Pickers.
Married Men's team.
Mustard Pickers lost to Single Men.
Leland lost to C. P. R.
Leland lost to Married Men.
C. P. R. lost to Married Men.

Castle Coombe Mission

11 a.m., Wainfleet School.
2:30 p.m., Mayfield Hall.
3:15 p.m., Sunday School.
R. A. Cameron, Student Missionary United Church.

Interesting Tennis Games

Some interesting tennis games were played on the local courts on Wednesday, when a number of players from Leland were visitors. Those present were—three Barnes brothers, P. Brown and son, F. Lynde, P. Spougen, E. McFarland. Some of the players were accompanied by their wives and families. Altogether a very enjoyable and social time was spent.
is more than a whirl of pleasure, and last find happiness in domesticity.
This picture is being shown at the Empress Theatre, this week—Friday and Saturday.

Tennis Draw For Ladies' and Gentlemen's Doubles

Mrs. A. K. McNeill and Mrs. Bessie vs. Mrs. McCune and Mrs. J. McNeill.
Miss Gillies and Clark versus winners of Mrs. Pool and Miss Brown versus Mrs. Aetion and Miss Clott.
McClure and McEchtern vs. Dowler and Usher, ex. vs. Stathers and Aetion vs. Storey and Hankin.
J. and S. McPherson vs. winners of Schofield and Nielson vs. Pool and J. McNeill.
McNeill and Usher vs. Dr. McNeill and Father Sullivan.
Boyd and Basarab vs. Hendry and Grant.

Do You Know Marquis

To identify a variety of wheat from its description on paper is almost an impossibility, unless it is that one has made an intensive study of our wheat varieties. In spite of this statement there is a demand for a description of certain characters which will assist in identifying the heads of Marquis wheat. Without entering into minute detail, certain distinguishing characters are outlined below.
Fusiform describes the shape of a head of Marquis using a front view. A fusiform head is a head which is more or less spindle-shaped and tapers like the root of a carrot gradually from the base to the tip. Under normal conditions ten internodes occupy a space of 48 to 58 millimetres. A few short awns are found at the tip of the head but these are some what variable in length.
Glumes are an important consideration in examining for Marquis. It is here that the average grower fails in his selection work. In examining hundreds of samples of Marquis grown at the Dominion Experimental Station, Scott, the conclusion was reached.
When ripe, the glumes of Marquis are creamy white and absolutely smooth. Usually the glumes are twice as long as wide. The shape of Marquis glumes is an exciting requirement. For this reason the glumes in the seventh node of the head are used for this purpose. More exacting requirements are demanded of the secondary glume which is often the determining factor in identifying Marquis. Under normal conditions the shoulder of

Clean Farm Roadside

The attention of the farmers is directed to Section 4, subsection 3 of the Noxious Weeds Act, which reads as follows: "Every owner or occupant in an improvement district, shall destroy all noxious weeds or weed seeds on the area between the boundaries of his land and the centre line of all contiguous roads and road allowances, and for the purposes of this Act, shall be deemed to be the owner or occupant of this area." "It is the duty therefore of every farmer to mow the weeds along the roadside adjacent to his land."
It should also be his pleasure to do so, because a farm with clean borders and roadsides is always attractive and a pleasure to look at.
At the same time, by clearing the borders and roadsides at least once a year, the farmer is helping to keep the roads open for winter traffic. Clean road sides allow the snow to blow off the road.
It is hoped that all roadsides will be cleared up during the coming week.

Report of Cream Prices

For the week ending June 28, 1930, the following prices were reported paid by creameries per pound of butterfat in several grades of cream, and at the points shown:
Calgary Creameries, special grade, 27c., No. 1, 25c., No. 2, 22c.
Minimum: Special grade, 25c., No. 1, 23c., No. 2, 20c.

Miss Holly Clark, returned on Friday last from her holiday vacation.

This glume should be square, but slight variations occur, depending on environment. The back of this glume is always acute and this is often the determining consideration in identifying Marquis.

For a detailed description and illustrations of Marquis, the reader is referred to pamphlet No. 95, "Marquis Wheat" by Newman and Fraser, Dept. of Agriculture, Ottawa.

Mr. Dunning To Speak At Medicine Hat

Mr. Dunning, Minister of Finance, will speak in Medicine Hat, on July 15th at 8 p.m.

Acadia Valley Win At Bindloss

Acadia Valley played a league baseball game at Bindloss on Wednesday. The Valley boys were in good form and took the large end of an 11-3 score.

Mayfield Picnic

Mayfield are holding their annual picnic on Wednesday, July 16th. Sports will include Soft Ball tournament, Junior Field Sports, Horseshoe tournament, Baby Show, etc., with dance at night. Tea and coffee will be served free on the grounds.

Junior Baseball

The Acadia Valley Junior ball team were visitors to town on Friday last, and took the local juniors into camp on the large end of a heavy scoring game.

Anglican Church Service

Services for Sunday, July 14th:
11 a.m., Mattins, Estuary.
3 p.m., Evensong, Cavendish.
7:30 p.m., Evensong, Empress.
Vestry meeting in Clergy House, Saturday, July 13th, at 8 p.m.
Celebration of the Holy Communion, Sunday, July 27th, at 11 a.m.
L. L. Grant, Incumbent.

To Hold Liberal Rally At Mayfield Picnic

Hon. Geo. Langley and Chas. A. Henderson, candidate for the Federal Constituency of Kinslerley, will address electors at a grand Liberal rally at the Mayfield Picnic on July 16th.

Mr. and Mrs. M. Hearn, and family, of Vanguard, were visitors to town Saturday, and were guests of Mr. and Mrs. Wm. Connell. They were on their way to the National Park, by car, on a holiday trip. Mr. Hearn said that crops in the Vanguard district are very poor, and he thought that the crops of this district and along this line were blue.

JOB PRINTING

Visiting Cards, Business Cards
Letterheads, Statements, Envelopes, Posters, Auction Sale Posters and Commercial Printing.

The Rockies Are Calling You

The combination of the extremes of natural and sophisticated at Banff Springs Hotel and Chateau Lake Louise, which open May 15 and June 1, packed into the wilds by horse or you may dine on exotic dainties drawn from the ends of the earth. You may be strictly formal or you may wander around in plus fours—everything goes, whether you are admiring the moonlight on snow-crowned peaks or lolling at your ease to a composition dance orchestra playing the latest blue. Anyone visiting either of these hotels has laid in a memory that will last a lifetime. Lay-out shows, left, view from Chateau Lake Louise; lower right, the Banff Springs Hotel.

All Party Leaders In Britain May Participate In Empire Conference

London, England.—All three British political parties may participate in the forthcoming Imperial Conference, according to the political correspondent of "The People." He says there is a possibility of Premier MacDonald may take the unprecedented step when he is appointing the British delegates to the conference of inviting Rt. Hon. Stanley Baldwin, leader of the Conservatives, and Rt. Hon. David Lloyd George, leader of the Liberals, to attend and participate in the discussions.

The premier, the correspondent says, has always felt Empire discussions should be non-partisan as possible in order to minimize the risk of an incoming government reversing its predecessor's policy and thus causing ill-feeling among the Dominions.

According to the correspondent, the British Government has sent proposals for Empire co-operation to lay before the conference. It considers its proposals so vital it is anxious to ensure they will be carried into effect no matter what party attains power in Great Britain.

Rt. Hon. J. H. Thomas, who a few days ago resigned his post as Lord Privy Seal and Minister of Employment, and became secretary of the Dominions, is said to be devoting all his time during the next three months to the preparation of specific schemes for submission to the delegates from the Dominions.

By the time the Empire Delegates have arrived, the correspondent says, the Government will have prepared a detailed scheme for the bulk purchase and importation into Great Britain of a large proportion of the wheat and other grain crops of the Dominions.

A cabinet sub-committee is at present working out a detailed plan to smooth out market fluctuations due to excessive speculation in the grain markets, in order to give the producers of the Dominions a fair price and a definite contract for a fixed period.

In return, the correspondent predicts, the Dominions will be asked by British manufacturers to purchase goods and proposals will be discussed for establishing British co-operative selling agencies in the Dominions. Attention also has been made to secure an agreement for expediting huge development works in the Dominions, such as dams and electrical installations, in order to both enrich the Dominions and provide employment on machinery manufactured in the plants of Great Britain.

Grain Elevator Burned

Cause Of Fire Believed To Be Spontaneous Combustion

Silton, Sask.—The Pool elevator, built in 1912 and containing 11,000 bushels of grain, and with a burning heap, on Wednesday morning, June 1, as the result of a fire that broke out at the night before. The loss is estimated at about \$35,000. The fire is believed to have been caused by spontaneous combustion. Seven empty C.P.R. box cars standing on the loading tracks when the fire commenced, were pushed to safety by manhandling them further away.

Dominion Government Has Subsidized Coal For Western Provinces

Ottawa.—The terms by which inter-provincial movement of Western Canadian bituminous coal will be subsidized by the Dominion Government were announced by Hon. Charles Stewart, Minister of the Interior.

By an order-in-council signed by the Governor-General, and under the Crown's West Pass district of British Columbia, and in the bituminous and sub-bituminous areas of Alberta, are assigned to points in the province of Manitoba to be subject to a reduction of freight rates which will enable it to compete with foreign coal. The assistance to the industry will be \$1 a ton, effective for one year beginning June 1. The reduced rate will be applicable to coal used for domestic and industrial purposes.

Another order-in-council will give assistance of 50 cents a ton on shipments of lignite coal in carbonized form mined in Saskatchewan and

Needs Canada's Co-Operation

Without Her Help Britain Cannot Develop Atlantic Airways

London, England.—The air lines of the British Empire are expanding rapidly and rank second only in mileage, to those of the United States, declared Rt. Hon. Lord Thomson, secretary of state for air, in the House of Lords, during a broad and inspiring review of the Empire's accomplishments in the world of flying.

Lord Thomson predicted an era of great aerial expansion within the Empire in the next year or so. He stated there were now about 22,500 miles of regular air routes. He hoped the end of 1931 would see an extension of the Indian route towards Australia, but the date for the completion of this plan, he said, rested largely with the government of Australia.

The Cape to Cairo route should be completed as far as the great lakes of Central Africa by the end of this year and be in full operation by the spring of 1931.

Lord Thomson praised the opening up of what was called the Atlantic airways in the western Atlantic, which, he declared, although tardy, could only be carried through with the co-operation of the Canadian government and the most sympathetic friends and representatives of Canada.

A great deal of work had been done by the consultative committee established last July, and the secretary of state for air. They had reported favorably on the Atlantic airways scheme and he was fairly confident now that "we should be able to do something along this line."

Icelanders Leave

For Celebration

Winnipeg, Man.—Prominent members of western Canadian Icelandic communities numbering 150, left here June 1, for a celebration of the centennial of the Althing, to be held in Reykjavik, Iceland, this month.

At the station, hundreds of friends and representatives of local organizations gathered to farewell the party, which includes Prof. R. Beck, head of the department of Scandinavian languages, University of North Dakota, and H. Westergaard, Norwegian vice-consul at Estevan, Sask.

Invited To Canada

Buenos Aires, Argentina.—The Canadian Government, through its trade commissioner here, has invited the Agrarian Producers' Union to send a delegation to Canada to study principal centers of production for studying modern methods of handling cereals and the Canadian grain elevator system.

Depends On France

Rome.—Italy is waiting to see 1930 naval building programme pending the outcome of the proposed Franco-Italian conversations on naval limitations. If France agrees to do the same, Dino Grandi, the foreign minister, announces.

is applicable only when briguettes are used for domestic or industrial purposes. It will apply for one year, commencing June 1.

The aid to the coal industry of more than 11,000 British thermal units per pound in the raw state. "This assistance," declared the Minister of the Interior, "is in line with the government's policy of giving every encouragement to Canadian products and industry. It will result in lower costs to the consumer and will, it is believed, do much to relieve the unemployment situation, whereby miners are working only a few hours a week."

Question Can Wait Action

No Hurry On Fixing Bay Route Insurance Rates On Shipping

Ottawa, Ont.—Question of insurance rates on shipping by the Hudson Bay route is relatively unimportant at the present time, stated Hon. T. A. Chalmers, Minister of Railways and Canals. His statement referred to the report of the Imperial shipping committee to the Canadian Government, saying that it will be impossible to fix rates until navigation is under way and the effect of ice-barrages and direction finding wireless equipment is established.

Mr. Crear mentioned that it will be 14 to 15 months before European traffic uses the bay route to pay content.

When asked if the government would take over the insurance of shipping until the new rates are struck, Mr. Crear said no consideration had been given to that phase of the question.

Cambridge Honors Noted Men

Degrees Were Conferred By Newly Installed Chancellor

Cambridge, England.—Former Premier Rt. Hon. Stanley Baldwin, newly installed chancellor of Cambridge University, presided at a function during which honorary degrees were conferred on 16 distinguished men.

The recipients of degrees as doctors of law included the Duke of Gloucester, Viscount Bridgeman, Rt. Hon. Arthur Henderson, foreign secretary, and United States Ambassador Charles G. Dawes.

Prof. Arthur E.instein was one of those receiving an honorary degree of doctor and science, while honorary degrees of doctor of letters were bestowed upon Sir James B. H. John Galsworthy, Prof. Lascelles Abercrombie, Professor of English Literature at the University of London.

Strike Natural Gas Well

In Search For Water Near Hudson Bay Junction

Heath River Junction, Sask.—There was a big rush here for natural gas, when prospectors and citizens left for the scene of a blazing well, 20 miles south of Hudson Bay Junction.

While a C.N.R. well digging outfit "sough" water at a depth of 300 feet, they took a gas seeping and set a match to it. It ignited at once and is still burning with a flame about ten feet high. There are indications of oil at some points in this district and claims have been staked over the last few years but this is the first inclination towards a natural gas well. It is reported that if the well were deepened a great supply of gas would be released.

Blue Print Makes Air Trip

Carried By Wind From Melita, Manitoba To Saskatchewan Town, Brandon.—Carried more than 175 miles through the air by the high winds, a blue print travelled from Melita, Man., to Assiniboia, Sask., where it was picked out of the air by a resident of the latter town. The Rev. R. McClelland, Ltd., received the blue-print back in their office with the notation on it from Assiniboia, "picked this out of the air during big blow. Some record."

The print had been sent to Melita in a bid for some work and was known to have been in the possession of the Melita people, and no other copy was in existence.

NEW U. S. MINISTER

Canada Will Be Represented

Delegates Have Sailed For World Power Conference At Berlin

Ottawa.—Canada will be well represented at the second world power conference to be held in Berlin, Germany, June 16-25. It was announced by Dr. Charles Cansell, deputy Minister of Mines and Chairman of the National Committee. Not only have many Canadian delegates sailed, but several papers will be delivered on the water power resources of this country.

Among the Canadian delegation will be Dr. Cansell, John Murphy, electrical engineer, Department of Railways and Canals; Hon. F. P. Borden, Minister of Lands, British Columbia; Dr. T. H. Hogg, chief hydraulic engineer, Hydro-Electric Power Commission of Ontario; G. A. Macdonald, general manager, Winnipeg Hydro-Electric System.

A feature of the conference will be a telephone radio hookup on the occasion of the official banquet, on June 18, 3 P.M. at the Hotel de Ville, Berlin, Germany, and at the same time, Hon. F. P. Borden, Minister of Lands, British Columbia, and Hon. J. G. Macdonald, general manager, Winnipeg Hydro-Electric System, will be in the house.

Mr. Edson will speak from his laboratory in New Jersey.

Message From King George

Repplies To Congratulations On Birthday From People Of Canada

Ottawa, Ont.—Replying to a message of congratulation sent on behalf of the government and the people of Canada, His Majesty King George, called Premier King as follows: "I sincerely thank you, the government and people of Canada, for your greetings and good wishes on this anniversary of my birthday. I fully appreciate the loyal sentiments to which your message gives expression."

Election Cost Estimated

Will Be About \$2,000,000, the Highest On Record

Ottawa.—Julius Castonguay, chief electoral officer, estimated that the coming election will cost the Federal treasury \$2,000,000—the highest on record. He said there would be 30,000 polls and it would cost from \$20 to \$30 to man each poll.

The preparation of the voters' lists containing 4,000,000 names will cost about 25 cents a name when enumeration, registration, revision, and printing of lists had been concluded.

British Press Urged To Increase Space Given To Dominion Happenings

Calgary Man On Committee

Members Of Pension Board Have Been Announced By Minister Of Health

Ottawa.—The personnel of the War Veterans' Allowance Act Committee was announced by Hon. J. H. King, Minister of Health and President of the Federal Cabinet.

The chairman is Walter S. Woods of Calgary. Other members of the committee are Lieut-Col. Douglas Carmichael and Major F. J. Garneau.

Mr. Woods was a member of the Division of the Canadian contingent and for the last ten years has been superintendent of the Soldiers' Settlement Board at Calgary. Col. Carmichael, who comes from Owen Sound, was minister without portfolio in the Drury government. Major Garneau is the son of the late B. E. Garneau, of Quebec, Que. He is a member of the staff of the Department of Soldiers' Civil Reestablishment in Ottawa.

Grain Broker Sentenced

Winnipeg Man Is Given Two Years In Penitentiary

Winnipeg, Man.—F. H. Bole, prominent Winnipeg grain man, was sentenced two years in penitentiary on charges of obtaining money from the Bank of Montreal by false statements. Mr. Bole, who was head of the Electric Elevator Company, Limited, recently suspended from trading on the Winnipeg exchange, pleaded guilty to provincial police court.

Three charges were laid against the grain official, covering amounts totaling \$85,000 alleged to have been obtained from the bank. After passing a plea of guilty to all three charges, Mr. Bole was sentenced to one year on charge, and two years on each of the other two charges. All sentences, the court ruled are to run concurrently.

Population Of Canada

Has Increased Over One Million Since Last Census

Toronto.—The Toronto Globe publishes the following dispatch from its Ottawa correspondent: "The population of Canada is officially estimated at 9,700,800, an increase of more than 1,000,000 since last census in 1921, when the population was officially placed at 8,788,000. Since the last census there were 2,172,622 births up to December 31, 1929, and 938,866 deaths. The natural increase therefore was 1,233,756."

Immigrants totalled 1,130,659 have been 1,135,455 at the present time, has lost the Dominion lost 1,366,655 persons during the nine-year period, either to the United States, Europe, or other countries, or because many immigrants went home again.

Prairie Leaders Say Immigration Control Secured From Ottawa

Regina.—Commenting on despatches from Edmonton and Winnipeg, Premier J. T. M. Anderson said that Saskatchewan had secured an understanding with Ottawa that the province would in future have control of the character and number of immigrants. While no agreement has yet been signed, the province has an understanding similar to that now existing in the other prairie administrations.

Edmonton.—All immigrants coming into Alberta from now on are to be voluntary, coming on their own responsibility, and prepared to take care of themselves, by agreement with the Dominion Government, says Acting Premier Hon. George Hoadley. The right to determine the volume and character of future immigration is to be left to the provinces.

The agreement dated from June 1 and no further movements are to be allowed without the knowledge and approval of the provincial governments.

The agreements with the transportation companies, under which immigrant parties have heretofore been brought over, expired at the end of May and will not be renewed.

It is expected that the inter-provincial conference between the three

London, England.—Small space devoted to news of Dominion happenings by the British press was a subject of criticism at session of the Imperial Press Conference. Canadian delegates particularly expressed their disappointment at the way in which news of Canada was lacking.

Discussion was started by an Australian motion, which affirmed the desirability of wider public knowledge of inter-empire affairs and urged earnest consideration of the matter in the British press to Dominion happenings.

Lord Riddell, owner of several newspapers, contested the view that the London newspaper was not interested in Dominion news. Hon. Frank Carr, managing director of the Chronicle-Telegraph, Quebec, cited the case of a London 16-page paper, the Dominion.

The congress of the Empire Chambers of Commerce had been discussing in London the highly important question of commercial relations within the Empire, yet this particular paper gave only four inches of space to the subject.

B. C. Nicholas, managing director of the Victoria, B.C. Times, observed that even the small Canadian dailies published reports of the last British elections, for completeness, could hardly have been surprised by the London press. Mr. Nicholas was rather disappointed to find British newspapers made so little mention of the political significance in Canada of the Imperial preference question.

Lord Riddell suggested certain lines of action for the Australian resolution and these were accepted by the sponsors. The resolution, as amended, was adopted.

The conference also adopted a resolution approving the action of the Empire conference of the Empire Press Union in inaugurating new cultural sides of Canadian life, these letters having been distributed throughout the Empire. The resolution recommended to the newspapers and the Empire co-operation along these lines laid down by Canada.

New Radio Receiver

Atlantic City, N.J.—A radio receiver capable of adjustment to compensate for total degrees of the individual listener has been demonstrated by radio engineers assembled here. Julius G. Aceves, consulting engineer of the New York inventor of the device, explained its function and performance before a meeting of the Radio Club of America.

Will Fly To U.S.

London, England.—Captain Charles Kingsford-Smith, noted aviator, who after the Alberta elections, flew across the Atlantic from England, intends to start on his flight to the United States, or other countries, under conditions as suitable.

WHERE R-100 WILL "LAND"

Extensive preparations for handling the huge crowds who are expected to greet the monster dirigible upon its arrival at St. Hubert Air Field, near Montreal, on Friday, June 1, are being made by the Canadian National Railways.

Special trains will be operated from Beauport Station to St. Hubert, where trackside is being installed specially for the handling of this service.

The photographs show: Left, the huge mooring mast constructed in preparation for the arrival of the R-100. Upper, trackmen at work installing sidings in preparation for the special trains which will be operated during the dirigible's visit.

Prairie Provinces Are Well Equipped With Facilities For Marketing Purposes

Few large surplus-producing agricultural regions are as well equipped with facilities for the distribution and marketing of agricultural products as the Prairie provinces of Western Canada. Two transcontinental railways with thousands of miles of branch lines tap every part of this producing territory of the region. On the west these railways deliver prairie products to the ports of Vancouver and Prince Rupert. To the east the products are either carried by rail routes to the Atlantic seaboard or St. Lawrence River ports or, as in the case of grain, delivered at the head of the Great Lakes. An additional outlet for products from this region is being provided by way of the Hudson's Bay. A railway extending northward from the heart of the producing territory now finds an outlet through Churchill on the Bay, where facilities are being provided for handling grain and other products by a new short route to the markets of the British Isles and Europe. Radiating from the numerous small towns and cities on the prairie, the railway, run many thousands of miles of good roads for the delivery of farm products from the adjoining agricultural regions.

Western Canada is a surplus-producing region. The major portion of its products is marketed elsewhere in Canada, or in the markets of the world. There are, however, satisfactory local markets for many of the products of the prairie for most of the perishable products produced, such as fruits and vegetables. A large quantity of poultry and dairy products is also produced for home consumption. The surplus of these products, however, finds its way to distant markets. In the larger centres where railway terminate, facilities are provided for the handling of livestock, grain and other products. Outstanding progress has been made by the farmers of the Canadian west in the matter of co-operative marketing. Probably no group of farmers anywhere has advanced more in the matter of co-operation in marketing.

The Wheat Pool of Western Canada is the outstanding example of this development. More than fifty per cent of the grain of Western Canada is handled through this farmer-owned organization. About \$30,000,000 have been invested by growers in their own grain-handling facilities which consist of approximately fifteen hundred country elevators and a dozen or more large terminals at Great Lakes and Pacific Coast ports. Another outstanding farmer-owned grain-marketing association is the United Grain Growers, operating more than five hundred country elevators and engaging in various other phases of business on behalf of producers. A large part of the livestock in Western Canada is marketed through the Provincial Livestock Pools which, together with similar organizations in the eastern provinces, form a national livestock marketing agency. Similarly in the marketing of wool, a Dominion-wide organization with a western branch office at Regina is handling in the neighbourhood of four million pounds annually, which represents more than one third of the Canadian crop. So also in the marketing of seed grain, poultry and dairy products and in many other lines, extensive facilities have been provided by farmers themselves for the handling of their products. Many of the co-operative marketing organizations have been in existence for a period of ten to twenty years and have thus proven their worth. In competition with these farmer-owned and controlled organizations there are, of course, a well developed system of marketing operated by private capital.

Queen Elizabeth, of England, was presented with a wrist watch on New Year's Day, 1922. It was a ruby and diamond studded affair.

A stunning outfit for the deb and the little sub-deb who follows closely in the styles of her debutante sister, Style No. 3282 is a rayon printed crepe that would appeal to any smart miss in its attractive wide ruffles. The shoulder and hipline bows are of plain crepe in the deepest shade of the print.

The long-waisted bodice is caught with plaits at left hip beneath the bow, which makes the right side quite deep emphasizing its diagonal line. The gathered tiers of skirt are decidedly youthful and ripple softly each time water moves.

This versatile model comes in sizes 12, 14, 16, 18 and 20 years.

It is in dainty for afternoons in chiffon in tunic and shade, or soft fall silk crepe in independence blue.

Navy blue wool crepe with vivid red bow of fall silk crepe is neat and girlish for classroom.

Wood charcoal print, feather-weight self-checked twent, crepe de chine, crepe satin, and cotton crepe appropriate.

Pattern price 25 cents. Be sure to fill in size of pattern. Address: Pattern Department.

Beating Father Time

Two-Crop-a-Year System Speeds Up Research Work

The success which has attended the efforts of L. H. Newman, Dominion Cerealist, and his staff at the Central Experimental Farm of the Dominion Department of Agriculture in growing two crops of grain a year, one in the field and the other in the covered greenhouse, is a fine example of putting one over on Father Time. The most important work of the Cereal Division is the development of new varieties of cereal and other plants particularly adapted to Canadian conditions and demands. In the covered greenhouse grain harvested from field test plots in the fall is planted again within a month or so, and the work of research and development is carried forward another crop year during the one calendar year. This means in practical results that the research work which usually took from eight to ten years to carry out in connection with the present system of development under the old system of field test plots can now be done in from four to five years under the new two-crop-a-year system. The development is one of major significance to Canada's future as a producer of cereal and forage crops.

Poultry Grading A Success
Record Of Performance Has Resulted In Better Birds

Ten years in operation of the Canadian Record of Performance for Poultry under the supervision of the Dominion Live Stock Branch has resulted in 51,500 birds of various breeds qualified for R.O.P. certificates, having laid at least 150 eggs during the record year, while an additional 17,807 hens lay 225 eggs or more each during the record year have qualified for R.O.P. Advanced certificates. Record of Performance is a poultry grading medium open to commercial and farm flocks throughout Canada. Through which the best producing qualities of hens is determined and established in tangible form.

Menace To Farm Animals
Horsetail Weed Usually Found In Forty Countries

Horsetail, a weed familiar throughout Canada, is a menace to horses and other farm animals because of its poisonous properties. The Botanist of the Dominion Department of Agriculture, calling attention to the harmful effect of this weed on poultry, cattle, sheep and sometimes pigs, points out that the presence of the weed in fields is usually an indication of the need for drainage. In cases where the weed is found steps should be taken for its complete eradication through proper drainage and adequate soil cleaning by a thorough system of crop rotation.

Commercial Orchards In B.C.
In British Columbia commercial fruit-growing is of comparatively recent origin, but the development of commercial orcharding has been very rapid, especially during the last ten years.

The first apple trees were planted about 1850, but not until after the completion of the Canadian Pacific Railway in 1910 were there many trees planted for commercial purposes.

"Theobroma," the scientific name of cocoa, means "food of the gods."

C.N.R. WESTERN REGION OFFICIALS PROMOTED

Announcement has been made of the promotion of A. C. Egan, Winnipeg, controller, Canadian National Railways, western region, to assistant controller of disbursements for the system, with headquarters at Montreal.

T. J. Gracey, Winnipeg, assistant controller, is promoted to regional auditor. The appointments are effective, June 1.

Mr. Egan, who was born in Winnipeg, 1883, entered railway service in 1901. With the exception from 1910 to 1922, when he was in the T. & N. O. Railway, serving that company in various positions until 1920, when he became assistant auditor of disbursements, at Toronto, for the Canadian Northern Railway. In 1923, Mr. Gracey was transferred to Winnipeg to his present position, and now becomes regional auditor.

Mr. Gracey, who was born in Kingston, 1889, came to Winnipeg, May, 1923, to enter railway service, in 1904, with the T. & N. O. Railway.

Mr. Gracey, who was born in Kingston, 1889, came to Winnipeg, May, 1923, to enter railway service, in 1904, with the T. & N. O. Railway.

NEW PRESIDENT

Dr. Chas. Camsell, Deputy Minister of Mines, at Ottawa, who has been elected president of the Royal Society of Canada for 1930-31.

How Cologne Was Named

Is But Slightly Changed Form Of Latin Word Colonia

A recent oral questionnaire addressed to 25 persons at random revealed a hazy idea about the meaning of the word Cologne. The question was: "How did the German word Cologne get its name?" Several frankly admitted that they had not the faintest idea. Nearly all were sure that it had something to do with the perfume called eau de Cologne. One was quite sure she had read that the Rhine flowed over some fragrant rocks or something about the city and that eau de Cologne was bottled Rhine river water. They were all wrong. Cologne (Köln, in German), is nothing but a slightly changed form of the Latin word colonia. Its full name was Colonia Agrippina. This early city of the Uhl, a people mentioned by Julius Caesar, was changed to a Roman colony after Agrippina, who was in camp with her husband for several years. This Agrippina was the granddaughter of the famous Agrippa, the admiral of Augustus. One of her brothers was the Emperor Caligula, and her son was Caligula Agrippina. The city is rich in Roman antiquities.

Choice Of Two Methods

Molasses Can Be Given To Hens In Water Or Food

There are two methods of giving molasses to chickens. You can mix it at the rate of a pint of molasses to four quarts of water and give them this water to drink in usual quantities. Be sure to give a fresh supply daily after cleaning drinking vessels carefully, as molasses will ferment if left in vessels for a few days, especially in warm rooms or temperatures. If preferred, you can use this molasses water for mixing your wet mash and they will get it in feed.

World's Youngest Traveller

Only six weeks old, yet little baby Richards has spent four of those weeks in travelling 7,500 miles from London to the home of grandparents in London, England. The child's father and mother died within a few days of each other in the interior of India, and the baby was sent back to England.

A Quick Thinker

Henderson's evening suit was rather old-fashioned. His figure was not one which showed clothes to advantage, either.

One evening, as he stood in the vestibule of a restaurant waiting for his wife, a tall, pompous man came up to him.

"I say, my man, are you the head waiter?" he drawled.

"What Henderson lacked in hearing he made up in quick thinking. Without hesitation he turned to the other."

"No," he said, "but I heard of a young fellow today that he didn't want to see any more applicants for jobs."

A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a discovery at Vicuña, California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courthouse grounds. Its roots drew sustenance from the mold in the niches of the palm and from the sap of the palm tree. The parasite recently blossomed with the other fig trees.

No product in the world has as great a turnover as chewing-gum.

Black, brown and cinnamon bears all belong to the same species.

Natural deposits of sand and gravel occur in all the provinces of Canada.

Canadians No Longer Have Idea That East and West Are Separate Communities

Working To Music

Senegal Negroes Have Novel Method Of Ensuring Massed Action

A common exercise among teachers in Senegal is to have their pupils "sing music" to allow them to sing part of a tune and then break off, picking up the tune at a certain point an instant later. Among the negroes of Senegal, however, this exercise has a practical use that is not at all musical. When a vessel has got on to a sandbank the way of getting it off again is by a large number of divers plunging into the water together and lifting it on their shoulders. Sometimes as many as five hundred are engaged on such a task. They swim round the vessel all singing together and at the eighth bar, they "sing," mentally continuing the melody while under the water, that at the 12th bar they all push, or lift as the case may be, and at the 16th all rise to the surface again. By this means they have no need to be the leader counting off, beating, and none of their efforts are by any individual being before or behind the others. The result is that they must have a strong sense of time and tune.

Dodging Auto Test

British Scientists Think They Have Worked Out Plan

If you can do all of the things listed below you probably have a 50-50 chance of crossing Piccadilly Circus, in London, England, or St. James Street, Montreal, without getting hit by an automobile.

Scientists of the British Industrial Health Research Board have devised tests which they have designed actually measure the factor of accident proneness. They ask you to:

1. Hold a series of small circles passing at an increasing speed. Follow the irregular movements of a mechanically controlled pointer.

2. Keep a green disc controlled by two handles above a moving disc.

3. Keep the stylus with a ball on the end inside a small metal cup without touching the sides, the cup being moved in an irregular way.

4. Form a rectangle out of four pieces of differently shaped metal.

5. Step steps of metal of varying length into a frame.

French People Saving

Accounts In Banks Show Steady Increase Every Year

Despite all the crises France has passed through in recent years, French people have not lost their traditional habits of economy. Statistics of savings banks accounts, for 1929, which have just been published show that 9,814,000 people have accounts in savings banks and that the total deposits at the end of the year showed upward progress, last year totalling over \$800,000,000. Other statistics which have been published show that France has now the largest gold holdings per capita of any country in the world, beating even the United States. During the last year the amount of savings in these popular banks increased 13 per cent.

One evening, as he stood in the vestibule of a restaurant waiting for his wife, a tall, pompous man came up to him.

"I say, my man, are you the head waiter?" he drawled.

"What Henderson lacked in hearing he made up in quick thinking. Without hesitation he turned to the other."

"No," he said, "but I heard of a young fellow today that he didn't want to see any more applicants for jobs."

A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a discovery at Vicuña, California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courthouse grounds. Its roots drew sustenance from the mold in the niches of the palm and from the sap of the palm tree. The parasite recently blossomed with the other fig trees.

No product in the world has as great a turnover as chewing-gum.

Black, brown and cinnamon bears all belong to the same species.

Natural deposits of sand and gravel occur in all the provinces of Canada.

Of recent years a marked change has passed over the general conception of the relationship between the Eastern and Western metropolises of the Dominion. Not so long ago the accepted idea was that the clay belt of Ontario marked a gulf between the province and the prairie provinces as deep as the gulf which separated the thirst-parched Dives from Laramie, safe and happy in Abasco's boom. To the West lay the granary of Canada while eastward lay the predatory industrialized districts which regarded the granary as their own particular happy hunting ground. That idea has vanished, never to return.

This century has brought no more remarkable change than the realization that Canada is not divided up and parcelled out into two antagonistic and antipathetic communities. The clay belt of Ontario is now regarded as a link not a barrier. The terms of the new region north of Lake Superior will some day merge imperceptibly into the farm lands of Manitoba, Saskatchewan and Alberta, and in the further North the land, rich from the Maritime provinces, Westward will be found the same old Canada, with the same immense mineral wealth of the Dominion. In the future, possibly earlier than expected, mining towns will spring up and with them the rapid development of the industries that are invariably and inseparably associated with urban settlement. Then will arrive the Day of Canada, a day when the Dominion will step forth complete and fully rounded out naturally.

That may be anticipating, but mining and lumbering are not the only industries where Manitoba is beginning to trespass on what were so long regarded as preserves of Ontario and the West. And the third unexpected and hitherto unexpected field of enterprise is probably the last that would have occurred to the residents of Old Canada. Who among them would have supposed that the Manitoba industry recording the greatest gain in recent years would be one never before associated with our immediate Western neighbor.

Nothing else, indeed, than fishing. In an editorial in the St. Catharines Standard stated that during the past few years the inland fisheries production of Manitoba had increased over a hundred per cent. And in 1929, the market value of the \$30,000,000 of fish caught for commercial purposes in Lakes Winnipeg, Manitoba and Winnipegosis, and other lakes in the province, aggregated \$2,024,000. The same article noted that a steady expansion had also taken place in the fish production of the other prairie provinces, though they did not equal the gain disclosed in the new Manitoba total.

Indications, as this article also declared, that the advance will continue in each of the three provinces with additional fishing waters are being opened each year as settlement advances and transportation facilities are extended. It seems reasonable to expect that as settlement on Manitoba's Hudson Bay coast develops, sea fishing will be an increasingly important factor. Every indication of the multiplication of activities and lines of production in the west is welcomed by those in the older provinces who realize that true prosperity depends upon the economic soundness, stability and self-reliance of each of the various component parts of the whole country.

Refers a Canadian

A lion tamer in England, with a "weakness" for mounties, has asked Mayor Frank Plant for the name of a suitable man with whom he can correspond. A letter from the city, received by the Mayor, sets forth that the man must be of good birth, character, physique, ideal good looks and with good prospects. A postscript says that the lady "would like a Canadian mountie, if possible, to correspond with."

A Freak Fig Tree

Parasites may flourish right under the nose of the government, according to a discovery at Vicuña, California. A fig tree, about three feet high, was found growing out of the side of a palm tree in the courthouse grounds. Its roots drew sustenance from the mold in the niches of the palm and from the sap of the palm tree. The parasite recently blossomed with the other fig trees.

CHAPTER XV.—Continued.

"Oh, no, she doesn't!" contradicted Grandma, "not if she finds the right man, anyway. School teaching's all very well for a while; but I guess the girls are just the same inside as they were in my day, except maybe they're more sensible. A girl wants her own man and her own home and her own babies, whether she wears her skirts to her knees or trailing in the dust as they did when I was your age. I saw a letter in the Boston paper protesting about 'this leg show,' as the women called it. I made me sort of mad. I guess she was over seventy, or else terribly behind the times. I'm too old to make changes myself; but it would be a dull world if nobody made 'em; and for my part I can't see what's wrong with a pair of legs. Even Mrs. Merry's had her best dress shortened, though being the minister's wife I expect some folks'll criticize her. If you're not too tired, child, I think you'd better make something good for supper. The doctor's been scurrying 'round all day, and is liable to have an appetite. Here he comes now!"

CHAPTER XVI.

On a bright afternoon in late October, Charman, who had stayed after school to correct some papers, was just starting on her homeward walk when a familiar car approached and drew up beside her.

"Ride?" questioned Jim shortly. "You don't seem to be going my way," she answered.

"What if it? I'll have you back in time to get your supper, and a breath of air will do you good. Hop in!"

Charman obeyed. "I hope Grandma won't think I'm lost or kidnapped," she said uneasily; but in a moment Jim saw that she had relaxed, and guessed that his timely invitation was a relief.

"Tired?" he asked, as they moved away from the old brick schoolhouse and headed toward Eastboro. "A little," the girl admitted. "It's been a trying day. I suppose such days come to all school-ans, and I'm no exception."

"What was your special brand of trouble this time?"

Charman looked up with a quick smile. "Deacon Purdie."

"That old mad turtle! What business did he have with you?"

"Have you forgotten that he is now the deacon of the six?" replied Charman. "To make a long story short, Jim, Luella's oldest, won's a smart fellow. If there ever was one, was too impatient yesterday to be endured. I sent him home

room; and Grandma likes to talk with him."

"A fine chance she has when you and he are watching the moon rise from Wade's Hill," Jim countered with good-natured sarcasm.

"Whoever on this earth told you I climbed Wade's Hill with him?"

Charman was so astonished that Jim smiled as he replied: "It may have been the whip-poor-hill that was singing its head off somewhere in the vicinity that evening; and then again, maybe he was here, like Mrs. Baker. There's precious little to do, my friend, that Lizzie doesn't broadcast to—well, my mother, for instance. She hasn't forgiven me, I understand, for taking a detour from the straight and narrow path that leads to your front door; and in consequence . . ."

As he hesitated, Charman gave way to a peal of laughter in which he joined.

"I wonder why it is that our elders take our slights so much more deeply than we have than we do ourselves," said the girl at last. "Miss Lizzie thinks she owns a piece of me, you know. In her opinion every man in Wick-ald should be in love with me."

"She's not far off there," responded Jim gallantly. "But as for slights—well, I never . . ."

He was suddenly interrupted, and Charman stretched out an impulsive hand, laying it on one of those gripped the steering wheel; which unexpected contact caused the car to swerve.

"You don't own me any explanation, Jimmy."

"I think I do," he answered as she removed her hand, "not on the subject of Clara Darling."

"About what, then?" asked Charman in surprise.

They had reached Eastboro, and Jim answered, as he slowed up before the bank: "I'll tell you some day," but before she could ask more he had snatched within a side door that gave access to the building after banking hours.

On the way home, however, he skillfully managed to keep the conversation away from his own problems, and here he told of happenings at the bank that made her laugh—he asked questions about trivial things that kept her mind from her encounter with Deacon Purdie; and when he dropped her before the old Davis house at half-past five, Charman was a different girl from the discouraged teacher he had picked up an hour or so before.

"You're a good doctor, Jim," she said gratefully as she left him.

"Seems as if you'd been gone a week," commented Grandma, to whom Jim waved as he rode away.

"Not but what it's been sort of an exciting day, though. A man came through on his way to the White Mountains riding one of those infernal machines—a motorcycle. I mean, I heard him coming from clear down the street, so I was watching and saw everything plain as day. It's a wonder he hadn't killed a dozen children, going such a rate; and just as he got here Lizzie Baker's cat can across the road chasing the Garfield's Plymouth Rock rider that had got loose somehow. It was a combination, I'll admit to you. You know how benevolent when they cross a street, and—well, I can't see that much different if they do belong to the male sex. Anyhow, that man on the motorcycle turned

out so as not to hit the cat, and—well, I suppose he must have hit something for he went hand over heels and that contraption he was riding lying a-top of him with the engine whining."

"Was he killed?" gasped Charman.

(To Be Continued.)

Planning Bigger Airships

Could Be Constructed To Carry Paying Loads Says British Designer

Critics of the new airships were answered by Lieut.-Col. V. C. Richmond, the designer, and Major R. Scott, the navigator of R-101. They were the guests of the City Library Club at a luncheon in the Carpenter's Hall, London, England.

Colonel Richmond said that he could see no reason technically why airships much larger than those so far built should not be constructed to stand the stress of weather and to carry useful and paying loads.

Both Richmond and Scott, he thought, peculiarly suited to airship transport because of the long distances that had to be traversed over land.

Economics, just as much a question of research as the building of the ships, was to be the next part of their program. "Do not ask what will be the fare to India. You might as well have asked George Stephenson what would be the fare from Stockton to Darlington."

"Once speed has been achieved in conjunction with reasonable comfort, airship travel will become a necessity, and it is impossible to forecast what people will pay for a journey. It is equally impossible to pass an estimate on the quantity and value of passengers."

The factor of speed will create a demand. "None of the calamities predicted for the two new airships, had, he said, come to pass. Both R-101, and R-100 had flown their trials in some of the worst weather ever recorded for October and November. "Finally, the German navy now decided to copy us instead of our copying them."

In a new section, Colonel Richmond also said, was being put into R-101 to overcome the unexpectedly great weight of the engines and other components, and after research would be conducted into the problem of long journeys across the sea.

Major Scott said it was "quite wrong to say that hundreds of men were required to handle these ships. R-100 and R-101 had never had more than fourteen men to bring them to the mooring mast. In spite of all criticism, airship development had been a success, and what was now wanted was continuity of development. "We have to show that these ships are reliable and can run to schedule."

Slit From Carbon Dioxide
From carbon dioxide in the air eventually will be obtained wood pulp, artificial silk, paper, explosives, and other materials, said Dr. Herbert Lovett, president of the Society of Chemical Industry, in an address to the British Institution of Chemical Engineers. Everywhere in the atmosphere and water vapour, he said, is the same fundamental chemical constituent is found.

Before Her Baby Came
"I have used several bottles of Lydia E. Pinkham's Vegetable Compound and find it helps me wonderfully, especially before childbirth. I have five lovely children. After my last baby came I had a miserable pain in my right side so I bought another bottle of the compound and I feel fine now. I work outside during the fruit season in addition to my housework."—Mrs. Charles Singler, R. F. 3, St. Catharines, Ontario.

Inland Fisheries Show Gain in Production

Marketed Value Last Year in Manitoba Over Two Million Dollars

While agriculture, the basic industry of Manitoba, together with manufacturing, mining and other industries has advanced substantially in the province in recent years, the production from the inland fisheries has probably shown the greatest gain. In the past five years the fisheries production has increased more than 1700 per cent. In 1924 the market value of the fish caught in Lake Winnipeg, Manitoba, Winnipeg lakes and other lakes was \$1,232,000, while last year, it was \$2,634,000. In 1929 the commercial fishermen of the province caught 38,000,000 pounds of fish, a record for Manitoba, with a market value of \$2,634,000.

IS BABY TEETHING?

Teething time is a time of worry to most mothers. The baby is nervous, fretful, feverish. His little gums are swollen and sore; he has constipation, colds, and sometimes convulsions set in—neither baby nor mother can sleep. These troubles can be quickly banished, however, through the use of Baby's Own Tablets containing which Mrs. Louis Grubb, Westerville, Ohio, says: "I have used the Tablets for all my babies while teething and have found them a splendid remedy."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ontario.

Bananas Grown in England
An exhibit which attracted considerable comment at the Royal Horticultural Society's Fruit Show, in London, England, was a bunch of bananas weighing nearly half a cwt., which had been grown in England. This is the first time for 25 years that bananas grown in this country have been exhibited at one of the society's shows.

New Storage Elevator

It is reported from Ottawa that a 2,500-bushels interior storage elevator is to be built at Lebbidge by the Federal Government this year, supplementing prairie wheat storage facilities now existing in similar elevators at Saskatoon, Moose Jaw, Calgary and Edmonton.

A safe and sure medicine for a child troubled with worms is Mother Graves' Worm Exterminator.

Notay Nulances

A Massachusetts court has ruled that airplanes flying less than 100 feet from the ground commit a trespass on private air right. But what we are more interested in discovering is how far our horizontal air rights extend, as against the night-berry road?

Gyproc Gives PERMANENT PROTECTION

MADE FROM Gypsum rock, Gyproc Wall-board does not burn. And this year it has a new smooth ivory finish that needs no decoration

(when gypsum board) although you can tint, paper or plaster it if you wish.

Structurally strong, inexpensive, easily and quickly put up, Gyproc Wallboard gives permanent fire protection to the walls, ceilings and partitions of your home.

Your dealer's name is listed below. Ask him for complete details of this pioneer Canadian fireproof (when gypsum board) also write for free interesting book, "Building and Remodelling with Gyproc."

Miss Edith Howles, left for
Basketoon last week, where
she is attending summer school.

Mr. and Mrs. W. R. Brodie,
and family, went to Medicine
Hat on Sunday, by car.

Dan. Winn and Vern Hanna,
are attending the Stampede at
Calgary.

Mrs. McPherson is entertain-
ing her aunt, Mrs. Hall, of
Calgary.

Mr. and Mrs. N. Spence, of
Calgary, are the guests of Mrs.
E. S. Sexton.

Claude O'Leary, of the bank
staff, left via Alameda, on Friday
last, for his home at Nohfeld,
on a holiday vacation.

Mrs. C. R. Moore, and daughter,
Jean, left this week on a
holiday vacation to Lake Mani-
toba.

Mrs. Gilham, sr. and Mr. and
Mrs. Gilham, jr., of Cavendish,
were visitors to town, Monday.

Mr. and Mrs. E. Carlson,
have taken up residence in the
house south of the Catholic
church.

The days of the past week
have been featured by very
high temperatures, and swim-
ming in the river and creek
has been very popular.

Mr. and Mrs. H. McFarland,
and family, of Barons, Alta.,
have been visiting friends in
the country south-west of town.

Mrs. D. Cameron, and daugh-
ters, are spending a vacation
at the home of the former's
parents at Stavley, Alta.

Mrs. G. M. Miller, and child-
ren, spent a few days holiday
with the former's parents at
Swift Current.

Brewin and Gery Tucker, ar-
rived here on Friday from the
Pence River country, and are
packing furniture and other
effects that they had here, for
shipment there.

Mr. and Mrs. J. N. Anderson,
and family, have returned from
a few days trip to Calgary and
Clareholm.

In the finals of the local ten-
nis tournament, mixed doubles,
J. McNeill and Ruth Arthur
defeated Ken. Hendry and
Miss Gillies.

A meeting of all those hold-
ing oil leases in the Acadia-
Valley and Oyen districts, is
taking place in the Alberta
Hotel, Oyen, July 11.

Hazel Northcutt, left on Tues-
day for their schools to resume
their teaching duties.

Hot Weather Disturbances

The baby is more likely to
have more digestive upsets dur-
ing the hot weather than at
other seasons. The value of
breast feeding is seen at this
time. Digestive disturbances
do not occur as frequently in
babies who are being naturally
fed.

The milk for the artificially
fed baby, while it should at all
times, be carefully safeguarded,

must be looked after with even
additional precautions during
the hot weather.

During the hot weather, milk
is more easily contaminated.
Flies and insects which carry
infection, do not hesitate to
light on and bathe in the milk,
and so infect it. Milk must
always be kept covered and
protected from flies and in-
sects.

When milk is warm, any
germs which may have found
their way into it multiply at
an amazing rate. If such milk
is given to the baby, the heavy
dose of germs which he there-
by receives is apt to set up diar-
rheal conditions. Milk should
be kept cold, and this means on
ice. It must not be allowed to

stand around in the heat for
even short periods of time.
In hot weather, everyone is

Prince Launches Ship

Before an immense gathering, H. R. H. the Prince of Wales launch-
ed the \$2,000,000 Canadian Pacific liner Empress of Britain,
largest steamship in the British Empire, from the Clydebank yards,
June 11. The picture, snapped as the huge vessel had just taken
the water, was transmitted to this continent by radio a few seconds
later. Millions of listeners from all parts of the world heard
the Prince make the address at the launching and also the address
of E. W. Beatty, chairman and president of the Canadian Pacific
Railway, who followed His Royal Highness.

better with less food than usual.
This applies to the baby as well
as to adults. Do not overfeed
the baby in the summer. Do
not urge him to finish the bot-
tle if he does not seem inclin-
ed to do so. During the ex-
cessive heat, the amount of
milk is better reduced for the
time that the hot spell lasts.
Do not forget, however, that
the baby is thirsty in hot wea-
ther just as you are. He should
be given plenty of cool water
between feedings. Boil the
water, first of all, if there is
any doubt as to its purity.

When the days are hot, keep
the baby in as cool a place as is
available. His clothing should
be very light—a thin shirt and
a diaper are sufficient when it
is very hot. Sponge baths help
to keep the baby clean and cool.
Heat rash may occur at any
time. It is associated with ex-
cessive perspiration which may
occur as a result of the weath-
er or by the child's wearing
too much clothing. Lighter
clothing suitable to the weath-
er should be tried. The parts
affected by the rash should be
sponged several times a day
with a solution made up of one
teaspoonful of baking soda in
one pint of water.

If, in spite of all care, diar-
rhea does occur, it must be
recognized as a condition that
is serious and not to be treated
lightly. Stop all feedings, give
cool water to drink and send
for the doctor. If this is done
immediately, the condition is
checked before damage has
been done, or before it has tak-
en a firm hold.

Hot weather disturbances are
to be guarded against, but if
they do occur, there should be
no delay in dealing with them.
